

Dear Audience,

My name is Catalin Barbau and nowadays I am doing my Erasmus internship program between the warm walls of Celal Bayar University of Manisa. My home university by the way is 1 Decembrie 1918 Alba Iulia from Romania and imagine how I was amazed when I found out that there is another student from Manisa Celal Bayar University who is doing his practice in Alba Iulia. 'What a great coincidence!' these were the words of the whole International office from Manisa, words that belongs to me too, because I am also a part of this 'family -collective.'

Tahsin Günay is the name of the student with whom, in a way, we changed the universities. Even we represent two different faculties, (I come from Philology, Tahsin from International trade) we both do the same work as Erasmus Trainees, we work with documentary task in the middle of international Office activity. We both agreed that such experience will be useful in the terms of our future, because we started to get familiar with the Office work, and also we have the opportunity to develop and practice our English skills, but this, from my opinion is not the most important feature of an Erasmus program. An Erasmus program offers the opportunity to meet a new culture, to leave the comfort zone and to get used with new feelings and new surroundings.

Thank you see you and take care!!!!
